Completion of Baglihar Hydel Power Project

3317. SHRI B.K. HARIPRASAD: Will the Minister of WATER RESOURCES be pleased to state:

(a) whether due to faulty design of the Baglihar Hydel Power Project exposed by floods and landslides recently, the financial institutions have backed up from further funding of the project;

(b) whether only 70 meters of the dam has come up against a proposed 144 meters envisaged, with diversion tunnels and power house yet to be built; and

(c) whether the Centre will re-entrust the project to NIPC with guarantee of funds for early completion, since much efforts, mostly diplomatic had gone into resolving issues raised by Pakistan against the Baglihar project?

THE MINISTER OF WATER RESOURCES (PROF. SAIF-UD-DIN SOZ): (a) The Project Authority has stated that unprecedented and sustained floods during July-August, 2005 triggered massive landslides near the Dam Complex and resulted in blockage of Diversion Tunnels (already build). However, no damage was caused to the any permanent structure. As such the design was not faulty. Further, the financial institutions with whom the Jammu & Kashmir State Power Development Corporation has made financial arrangements for funding the Baglihar Project have at no point of time stopped or backed out from funding of the project.

(b) No Sir. 47% of the dam structure has been constructed. Besides about 80% of the procurement and fabrication of the hydro-mechanical and electro-mechanical works had been completed. 2 units of 150 MW each have been erected and third is in progress.

(c) It depends on the State Government, which is however already funding and implementing the project. The progress of execution of the project does not warrant any such action. Decision on the issues raised by Pakistan on the design of the project will be binding on both India and Pakistan, and accordingly on the State Government.

Pending irrigation projects

3318. SHRI V. HANUMANTHA RAO: Will the Minister of WATER RESOURCES be pleased to state:

(a) whether Government have a list of all pending irrigation projects in the country where people of all communities have been displaced in the five years;

(b) the list of projects and approximate number of people displaced respectively in the last five years;

(c) the list of projects which are ongoing presently and the respective number of displaced people in the various States; and
